Regional Development Pattern

- Structures
- Railroad
- Interstate highway
- Federal, state, town highway (excluding Class 4 town highways)
- Water

This map attempts to show the pattern of development across the Region by displaying structures, roads, and railroads. While features other than the structures and roads displayed here can constitute development, defining these other features and then mapping them would be difficult. By showing roads and structures, the map, taken in a regional context, should give the viewer a general idea of where in the Windham Region the majority of human activity and land modifications are located.
